biological  
effect  
of the  
AQUAPOL  
System**

**BIO**  
letter

## Our Philosophy

1. The peaceful utilization of two freely available natural sources of energy as a drive for the **AQUAPOL** unit for **drying out buildings** and decades of **keeping them dry**.
2. The further development and push ahead of an **integral concept** for drying out buildings and further necessary actions and redevelopment measures.
3. The increase of **quality of life** through the **AQUAPOL** -unit e.g. The **reduction of geological sources of diseases** (=geopathogenic influences).
4. The research and development of further peaceful **forms of application** in connection with the two existing natural sources of energy.

### The philosophical background of the AQUAPOL symbol

The name **AQUAPOL** is composed from the latin word **AQUA**, which means **water** and the syllable **POL**, which is a abbreviation of **polarisation**. Water molecules can be directed and orientated through exact fields of energy (= Orientation polarisation).

#### Symbol

In the middle of the symbol you see the earth from which derives a natural characteristic radiation. This however is an dynamic nature but not an electromagnetic one. This characteristic radiation of the earth is being received by an antenna system unit (The 3 visible aerials symbolize the antenna-like AQUAPOL-unit) and is fed back into the domain now polarized. It therefore functions in this specific dynamic energy spectrum of earth as the polarization of the received field.

This process has the effect that the water molecules (In the symbol the water drop left and right) move in a capillary system downwards (Process of dehydration) or upwards (Process of moisturization).

This technology has been discovered in Austria - maybe rediscovered - by Wilhelm Mohorn. The flag of Austria is supposed to symbolize the place of origin or the place of rediscovery.

Professor K. E. Lotz

# Biological Consequences

## Summary of the biological effects of the AQUAPOL System

Interviews with people who had an **AQUAPOL device** installation in their room, revealed the following biological effects: better sleep and well-being. Also a better room climate even in geologically disturbed houses (see below).

A scientific test, done with the means of a recognized electrical body resistance method (by the Research Circle for Geology Dr Hartmann in Germany) proved the geological attenuating effect of the **AQUAPOL device**.

Should the aforementioned short test be continued for several months (with different test persons in a series of tests) the attenuating effect on geological disturbances could be visibly verified.

At the same time mensurations have been done with a **2 channel ionmeter** (see page 8) on negative and positive ions<sup>1</sup> in the air (device by Professor Eichmeyer of Germany). On mensurations, done both in a short term test and over several weeks, a significant increase of ions in the air has been recorded in the "radius of action" and in the "area of space energy" of the **AQUAPOL device**. Especially the negative ions, which are known by science to be extremely favorable to the well being of a person.

The area of the receiving unit of space energy (see page 8) would be described as a "place of power", and there the number of ions increases.

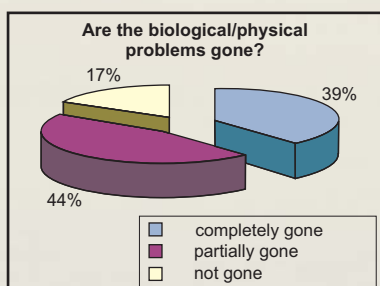

<sup>1</sup> positive or negative charged particle

Professor K. E. Lotz

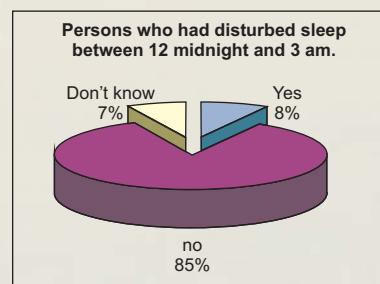

### HAK Study 2001

Federal Institute for Higher Technical Education and Research

The vast majority (83%) of **AQUAPOL** customers also profited in a biological respect. For the remaining 17% other stress factors were more dominant causes of illness than this earth radiation.

Approximately 8% of the **AQUAPOL** customers originally experienced had disturbed sleep between 12 midnight and 3 am. At this time of the night the earth radiation is at its strongest and has a biologically negative effect on a sleeping person.

# Statements of Experts

## The influence on physical health

### A scientist's experiences

The **AQUAPOL** company's device has been examined by me in a series of tests (November 1986 - February 1987) regarding the "block-off-effect" towards geopathogenic<sup>1)</sup> disturbance fields. We did several mental tests. These were done with adherence to a special method. This method was taught by me at the Baden Primary School in Germany, and was applied successfully by the course participants.

There we found out that the influences of geopathogenic disturbance-zones, that were caused by an underground watercourse, through several displaced rocklayers and the general magnetic field concentrations, has been reduced due to our **AQUAPOL device**.

Again and again the health raising area of a room increased from **61% to 94%**!

1) geopathogenic: Illness caused by earth

Professor Diploma Engineer. J. Seiser  
Vienna, Austria  
Previously Specialists Board at TGM4

### A Doctor's experiences

In the 1960s Doctor Ebeleseder moved into his house. Very soon massive health problems commenced: Allergy from "house dust mites", disturbed sleep, and the children getting tonsillitis and flues. In the course of time the whole family suffered from these symptoms. Dr Ebeleseder, by himself a radioaethetic, knew how this indisposition was caused: geopathogenic disturbance zones. For a considerable time however, he remained helpless with regards to this problem. Then, in 1988, he accidentally found out about the **AQUAPOL device**.

In the beginning he was sceptical, but then 2-3 weeks after installation of the device the condition of the entire family visibly improved.

The allergy from which Dr Ebeleseder suffered amazingly vanished. All symptoms of illness, that the family had experienced were gone.

Today the house is habitable, without any problems, and Dr Ebeleseder is absolutely convinced of the efficacy of the AQUAPOL device.

Doctor Günter Ebeleseder  
Schärding / Austria

### A radioaethetic talks about his experience

My neighbour's bedroom is above his cellar. His wife complains of disturbed sleep, which was previously unknown to her. Through mensurations I found the existence of general earth radiation. (especially the so called "Hartmann-rays", "Curry-rays", rays from an underground watercourse, and a so called "thundergrid") **Solution to the problem:** Mr. Moser installed an **AQUAPOL device** on 17 August 1989. **Result:** The rays were no longer noticeable!

In a later test the rays were immediately mensurable when we removed the device, whereas they again disappeared the moment that the **AQUAPOL device** was restored.

Independent Radioaethetic  
Dipl. Engineer Hans Gumpert  
Timmersdorf-Traboch, Austria

## Statements of Customers

Mr. Stiny, Austrian engineer, suffered mostly from massive insomnia, migraine and phlebitis. After radiesthetic investigations (finding radiation deriving from soil) it was clear that the house was built upon a geological disturbance zone. Despite moving from the affected room the problems returned, especially during TV viewing. Even their dog showed sign of discomfort in all areas of the house. Disturbance field problems existed also in his company offices in Vienna, that derived from watercourses. After several futile attempts with other methods Mr. Stiny found an article in the magazine "Space+Time" and became enlightened to the effectiveness of the **AQUAPOL system**.

The first system was installed in Vienna and it proved an immediate success. Mr Stiny decided to also install an AQUAPOL device in his Klosterneuburg house. Here, as in Vienna, there was the temporary intensification of the problems but after a week all unwanted conditions had disappeared completely. Even the dog registered the benefits!

Engineer Stiny, Klosterneuburg Lower-Austria

Mrs. Wiesinger explained that she suffered from profound sleeping disorders. After seeking a permanent solution and following several unsuccessful attempts to remove the problem, Mrs. Wiesinger was apprised of AQUAPOL through an advertisement. After her house was checked by a radiesthetic practitioner (to find earth radiation) and the following installation of an **AQUAPOL device** Mrs. Wiesinger experienced a gradual but significant improvement. Today Mrs. Wiesinger is very satisfied and can, without doubt, recommend the **AQUAPOL device**.

Mrs. Wiesinger, Wiesen/Burgenland

As the photo shows, the bloom points in two directions. Before the **AQUAPOL device** installation the blooms would always direct themselves toward the window, in the direction of light. After the installation the new bloom pointed toward the inside of the room! However, there are no windows in this direction only the **AQUAPOL device** is hanging there. We are enthusiastic about these effects since it is obvious that the new blooms are more attracted to the energy of the **AQUAPOL device** than to the light. Furthermore, in the years before that, only one or two blooms occurred every few months and we are now blessed with constant blooms!

All our plants now appear more full of life. Our flowers are simply happy. A phenomenon!!!

Thomas Claus Ziegler, Munich /Germany

**Only the real actual success counts!**

# Scientific Examinations

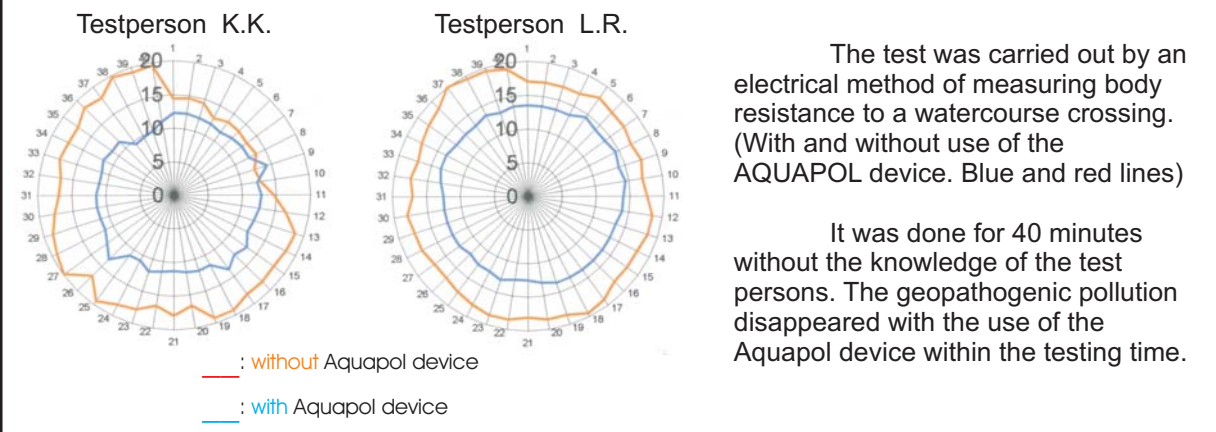

In 1990 a unique study was commissioned in Austria, this being financed by the “Domestic Architecture Research”. 6943 tests were carried out on 985 test persons employing 24 different methods of measurement. 500,000 scientific datums were recorded.

The result was astounding: Locational disturbance has an unequivocal negative effect on the regulation system of a person. One of the most reliable methods of measurement was the one of body resistance.

Despite this large scale study no attention has been given the fact of locational disturbance in either domestic architecture or medicine (a disadvantage).

## A short term test of the Research Circle for Geobiology (Dr. Hartmann, Germany)

A scientific test of the Research Circle for Geobiology confirms the geological attenuating efficacy of the AQUAPOL System.

The test was carried out by an electrical method of measuring body resistance to a watercourse crossing. (With and without use of the AQUAPOL device. Blue and red lines)

It was done for 40 minutes without the knowledge of the test persons. The geopathogenic pollution disappeared with the use of the Aquapol device within the testing time.

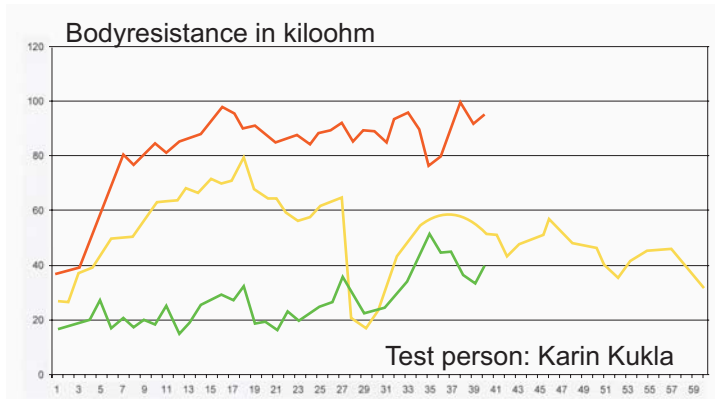

Body resistance measurement is the most simple and reliable method of establishing the effective overcoming of earth rays that is economical in both time and cost.

# A long term test in Austria

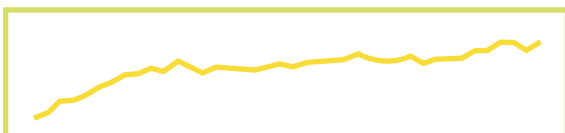

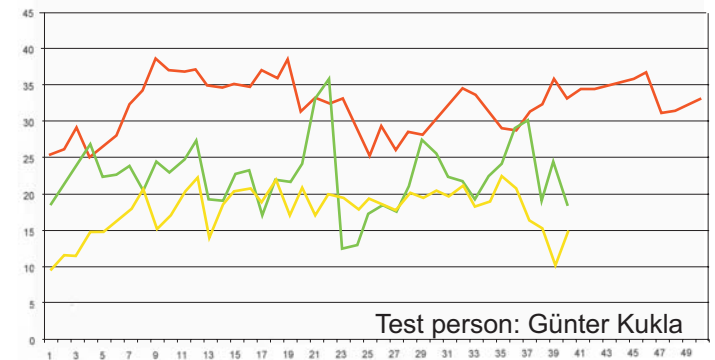

For approximately 6 months a test was done on a number of people suffering from the effects of earth rays. The effects of the AQUAPOL device were examined and the results were good without exception. The initially raised body resistance (a symptom of earth ray pollution) found it's own level in a bearable area.

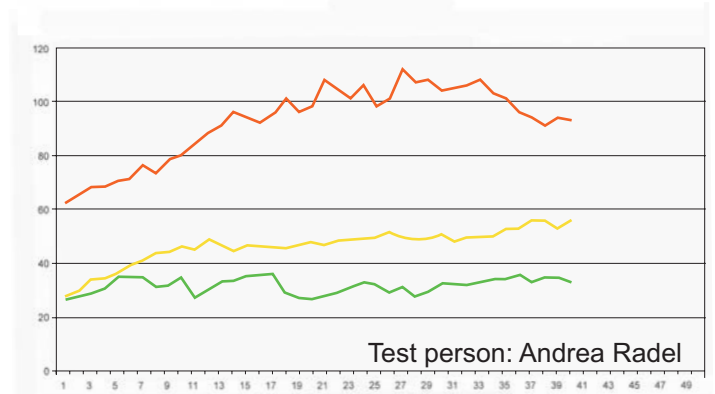

The **red graph** show the high body resistance of the test person, caused by the geologically disturbed areas.

The **green graph** show the bodyresistance of the person the same day. He stayed in undisturbed areas where he felt fine.

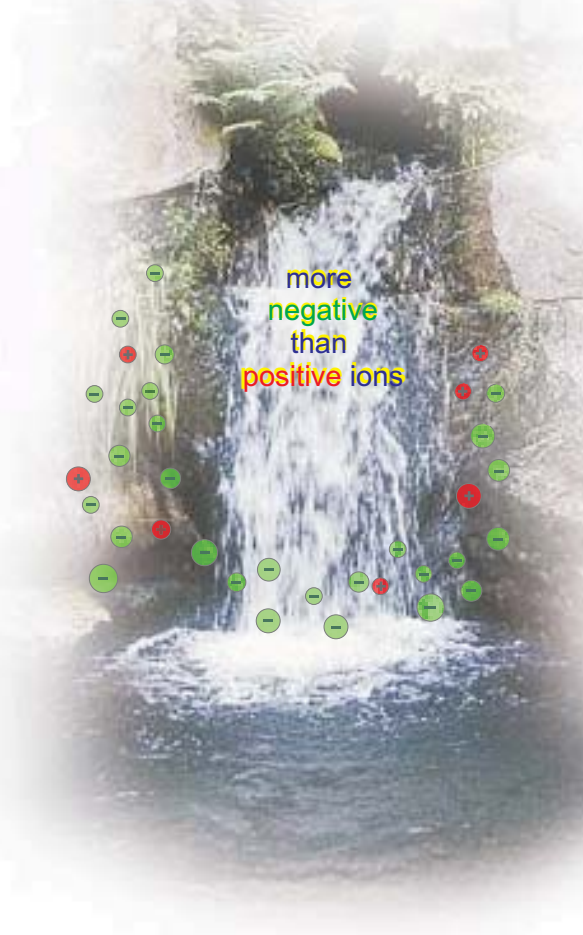

The **yellow graph** show the unequivocal effect of the AQUAPOL device on the person and the attenuating effect on the the earth rays. The longer the tests lasted the more satisfactory the results became.

**The long term effect proves by measurement that the AQUAPOL device has won the fight against earth rays for the welfare of man.**

# Further scientific tests

## Influence on the ion- balance <sup>1</sup>

How do you feel near to a waterfall?

Due to the dispersion of the water, negative air ions arise. They have an air cleansing, refreshing and activating effect and raise the life quality.

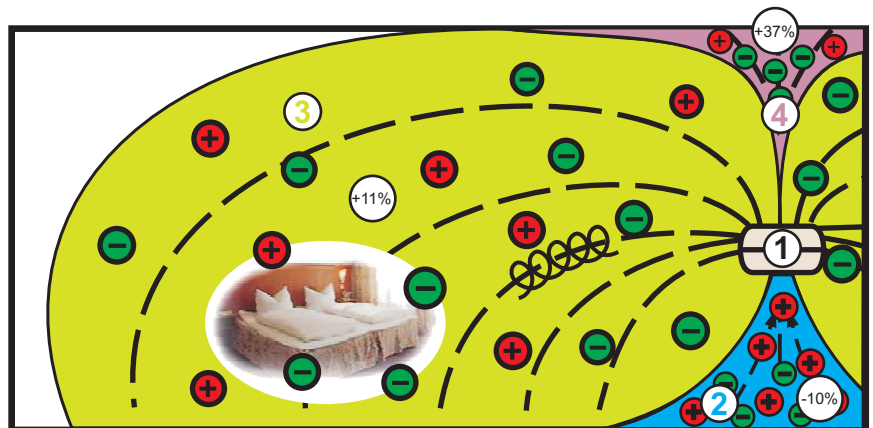

Professor Lotz with his 2 channel ion- measurement device

It is possible to measure these positive and negative air ions with a "2-channel ion-measurement device" (picture above). A scientific test done on the balance of the air ions in the area of influence of the **AQUAPOL device** demonstrated that the number of negative air ions changed as following:

- it decreased about 10% in the receiving area <sup>②</sup> of earth energy. (= biologically negative)
- it increased about 11% in the radius of action <sup>③</sup> (= biologically positive)
- it increased about 37% in the space energy receiving area <sup>④</sup> (= biologically very positive)

- ① **AQUAPOL device**
- ② Earth energy receiving area
- ③ radius of action, ideal for bedrooms
- ④ receiving area for space energy (place of power) place for meditation, working, learning etc.

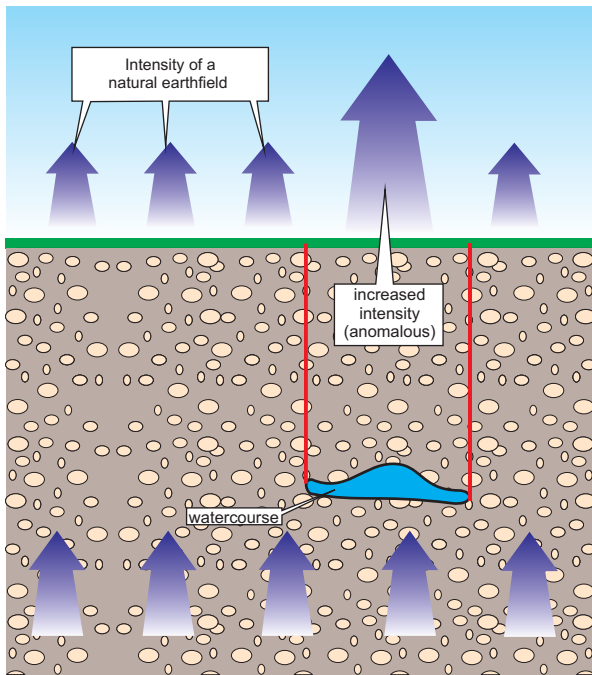

### Place of power:

A place of power is a location where body and spirit can gather energy.

<sup>1</sup> **Ion** : positive or negative charged particles

# What is earth radiation really?

A natural earth field is influenced in its intensity by a watercourse or other geological factors.

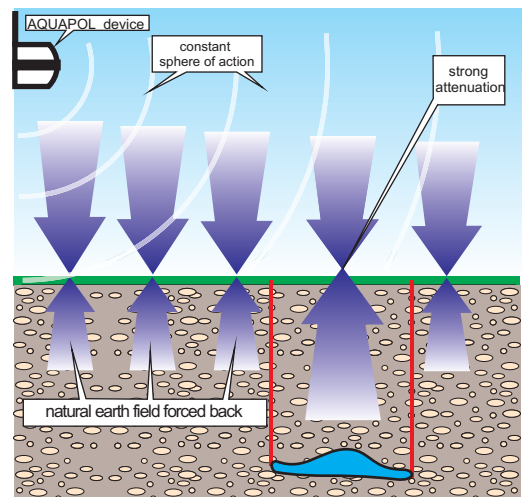

A watercourse acts like a lense on the earth field and amplifies this in its intensity. The frequency of this earth field (which is uncompletely researched) is very strong for an organism.

It has a very strong effect on water or watery systems like human beings, animals or plants.

**Earth radiation is primarily an anomaly of the intensity of the natural earth field which, due to its frequency, has an especially strong influence on watery systems.**

The AQUAPOL device builds up a relatively constant sphere of action that turns towards the ground. It also attenuates the negative anomalies of the earthfield which are negative for an organism.

The "secret" of the AQUAPOL device is that it works with **THIS** earthfield (soil energy) respectively with the amplified space energy.

**The sphere of action of the AQUAPOL device has the same nature as the natural earth field. It suppresses respectively attenuates the intensity anomaly and creates a proportionate (homogeneous), natural and biologically positive radius of action.**

## More information and DVD's

your advantage for superior knowledge

### **DVD Vol.I: The Magnetokinetic Dehydration Technology**

**The Magnetokinetic Masonry Dehydration; The AQUAPOL DVD Vol 1 explains in a simple way the following:**

- 1 Damage through **Rising Damp** in old buildings
- 2 The main causes of rising damp in the masonry
- 3 The intelligent solution: Magnetokinetics of AQUAPOL
- 4 Essential criteria of the Magnetokinetics in the building practice
- 5 AQUAPOL - production & models
- 6 AQUAPOL - choice of device and device installation
- 7 Magnetokinetic desalting process
